

# INCA ECO BINDER

## JOINTING SAND BINDER AND STABILISER

**INCA ECO BINDER for Interlocking Pavers,  
Concrete Slabs and Cobbles .**

**Bonds jointing sand particles together.**

**Prevents wind and water erosion of joints.**

**Reduces penetration of liquids through joints.**

- **Maintenance free paving**
- **No more weeds, ants nests and debris**
- **No more loss of joint filling sand when paving is cleaned**

# INCA ECO BINDER

## JOINTING SAND BINDER AND STABILISER

### **Stops weeds and fungal growth between pavers**

**APPLICATION** - The Inca Eco Binder system can be applied by a watering can, knapsack sprayer, watering carts or with long pressure hoses for those inaccessible slopes.

**PREPARATION**- Due to varying sand types, it is advisable to conduct tests with the specific sand particles to be treated. Inca Eco Binder is diluted with water, prior to application with a 1:10 ratio.

**COVERAGE** - Depending on the particle size and porosity, apply between 0,5 and 2 litres per square metre. ( Conduct sample tests to evaluate penetration level)

**EFFECTS** - Inca Eco Binder is absorbed into substrate and does not alter the colour. The product is non toxic and eco-friendly.

**ECONOMICS** - Material costs vary according to application.

*SABS tested and carries a manufacturers warranty.*

### ***Do it right the first time—Inca Bind it***
